Private Equity and Real Assets - IRR

As of June 30, 2026

Private Equity and Real Assets investments are better assessed using IRR (Internal Rate of Returns) instead of TWR (Time Weighted Returns) because of the nature of those investments (illiquidity, closed end structure…). The Private Equity and Real Assets managers have a control on the timing and magnitude of cash flows, and they are commonly evaluated by a IRR metric which takes that into account. The IRR returns are only for reference purposes, and only the TWR returns are rolled up to the total fund level.

The performance displayed is based on a quarterly lagged valuation of private markets as of December 31, 2025 and it is adjusted for cash flows and FX rate changes incurred between December 31, 2025 and the period the performance was presented, June 30, 2026.
